# ABOUT US

*We go above and beyond being your IT partner, by providing innovative solutions that meet today's complex technology challenges and enable next-gen IT services for your success.*

As a premier provider of Core IT Infrastructure, **NSP ITINFRA** offers comprehensive solutions including Infrastructure design and Implementation, Network setup, Information security, IT equipment (hardware and software) Rental services, Cloud migration, Security, and Storage appliance sales and Installations. Our expertise in modern Workspace Solutions, IT Infrastructure Services and Implementation and Information Security Services drives exceptional outcomes for organizations.

# CEO MESSAGE

## Manoj Kumar

In today's digital and cloud-based world, IT infrastructure is fundamental to your business, and your business performs only as well as your IT infrastructure. It empowers the users and runs the business's applications to build exceptional customer and employee experiences.

Technology innovation, as you know, is accelerating. So how do you keep up? How do you get leverage from innovative technology?

Let me share and introduce our new NSP ITInfra for modern, intelligent insights into innovations and expert guidance with Our four-service offering by NSP ITInfra Managed ServiceDesk, Modern Workplace Solution, Cloud Infra, and Security and protection.

Our services approach shows you how to stabilize, optimize and transform – from the current to the next steps where you realize the full value of the cloud continuum.

# OUR CASE STUDY

---

A case study can help make decisions by providing a detailed examination of a specific situation or scenario, which can shed light on the potential outcomes and consequences of different courses of action, allowing for informed and data-driven decision making.

01

## Collaborative way of working using Modern workplace

We engage with clients which provides IT Product & Services across the globe with more than 1000 employees providing service.

The NSP ITInfra team has been tasked with streamlining operations to boost employee productivity and save valuable time. It also helped in seamless communication and collaboration across locations and platforms while maintaining the security and integrity of systems and data.

02

## Improve Employee Productive with Proactive Help Desk Services

NSP ITInfra has taken on the challenge of streamlining a client's complex IT infrastructure ecosystem that provides IT products and services globally. The client's network is extensive, with over 300 devices, servers, and clouds that must be managed for seamless operations.

NSP ITInfra has been brought in to ensure that the client's operations run smoothly, increase productivity, and reduce downtime to nearly zero....

03

## Migrate on Premises application to Cloud Infrastructure.

NS is having ERP Product Suite and Field burst management system & having clients across the APAC zone. Traditionally, such an application was deployed or running from the back-office infrastructure, which limited the NS to scale up to many concurrent user and performance issues.

# HOW WE WORK

---
